

STYLUS

React Native · Expo 51 · iOS
bundle: com.styleos.app

THE APP — MVVM, ONE-WAY DATA FLOW

SCREENS — presentation layer

the "Sacred Boundary": UI only

Onboarding

Home("occasion")

Explore

Look-PDP

Product-PDP

TryOn

Cart

Account

reads state · calls actions
renders

VIEW MODELS — hooks · own loading / error / state

useOnboardingVM

useTryOnGenerationVM

useProductListVM

(look / cart VMS...)

call controllers

CONTROLLERS + FETCHERS — data layer

mock ■ api switch via createFetcher

onboardingController

tryOnController

catalogController (+ mockFetchers)

<> two chokepoints — nothing else talks to a backend <>

libs/fdkStore/fdkStore.ts

FDK SDK · lazy + signed

cookie → AsyncStorage

@gofynd/fdk-client-javascript@3.24

libs/supabaseStore/supabaseStore.ts

plain fetch + x-session-token

session → AsyncStorage

HTTPS · CORS *

COMMERCE

HTTPS + fp-signature (HMAC)

[LIVE] 121 products

VTO

HTTPS · direct fetch

FYND PLATFORM — storefront API

domain: https://api.sngz5.de

app: 6a1433b07e5924b4367da906 · co 5

client.catalog → getProducts,
getProductDetailBySlug, getProductPriceBySlug,
getCategories, getCollections, getCollectionItems

client.cart → addItem, updateCart

client.user → OTP login, profile

client.order / address / payment / wishlist

auth: session cookie

! 0 collections, 0 bundles yet

single-piece + look commerce

SUPABASE — VTO backend

qfumhgipfhzubmorymbd.supabase.co

Edge Functions (Deno):

create-session · update-session

analyze-body-measurements

process-full-body · generate-virtual-tryon

generate-video · get-gallery

Storage: vto-images bucket

PostgREST: vto_sessions table

AI: Vertex — Gemini / virtual-try-on-001 / Veo
(behind functions)

avatar + try-on render

STYLUS USER

one app · two backends

hashira-theme/ = the WEB reference client (FDK React theme).

Stylus reuses the SAME Fynd app + the SAME Supabase project it points at.

NOT a backend.
